If using IE version other than 6, you may need to apply the fix below to be able to access the database.

If you have the inability to access <u>www.sfwmd.gov/sderawebapp</u> and received an "ArcGIS error message", we suggest the following:

• Go into Internet Explorer. Click the **Compatibility View** button in the Address bar. When displayed, this button appears to the left of the **PRINT** button and contains an image of a broken piece of paper. This enables Compatibility mode for all documents in the domain of the Web site being viewed.
